Mariia Golubieva

PRODUCT MANAGER | LEAD BUSINESS ANALYST

Profile

I'm an experienced Lead Business Analyst with over 10 years of experience, seeking a more creative position in Product Management. During my work as a BA and PM, I've helped teams turn ambiguous business needs into clear, deliverable solutions—facilitating stakeholder conversations, writing concise user stories and diagrams, and mentoring junior BAs.

I focus on clarity, collaboration, and solving the real user problems behind technical work. I combine analytical precision with a human-centric approach to ensure that people remain the most valuable asset in every project.

Core Competencies

- **Leadership:** Team Scaling (3–70+), Mentorship, Stakeholder Diplomacy, Strategic Facilitation.
- **Methodologies:** SAFe (Scaled Agile), Kanban, Scrum, SDLC, Change Management.
- **Analysis & Visualization:** BPMN 2.0, User Journey Mapping, Empathy Mapping, Product Roadmapping, User Flow Diagrams.
- **Technical Focus:** Data Analysis, Enterprise Integration (15+ teams), Root Cause Analysis, AI-Augmented Documentation.

Employment History

Lead Business Analyst, TietoEvry Create Ukraine (Infopulse)

2020 – PRESENT

Orchestrating requirements for a next-generation global auditing platform.

- **Organizational Architecture:** Led a pivotal structural split of a unified 70+ person POD into three specialized workstreams. Designed the communication and responsibility frameworks that ensured a seamless transition without loss of institutional knowledge.
- **Strategic Facilitation:** Facilitate high-intensity cross-team refinements and stakeholder calls, driving consensus among diverse groups and synthesizing complex information into actionable next steps.
- **Methodology Leadership:** Synchronize requirements delivery within the SAFe framework while simultaneously leading production support activities using Kanban to resolve critical incidents and maintain platform stability.
- **Precision Engineering:** Authored thousands of user stories and visual artifacts (BPMN, User Journeys, Roadmaps) to manage the complexity of the platform and requirements collected during years of development.
- **Mentorship:** Personally onboarded and mentored junior/mid-level BAs and conducted Knowledge Transfer (KT) sessions for technical teams, translating dense audit procedures into plain language.

Core Daily Responsibilities

- **SDLC Orchestration & Delivery:** Actively participate in tracking and synchronization of the activities of development and QA teams to ensure alignment with sprint goals, priorities and platform quality standards.
- **Backlog & Feature Management:** Own and optimize the product backlog; prioritizing features, user stories and defects and ensuring a consistent flow of work that aligns with the long-term product roadmap.

Skills

- Leadership
- Business Analysis
- Requirements Gathering
- Data Analysis
- Stakeholder Diplomacy
- Product Roadmapping
- AI-Augmented Documentation
- PM Methodologies

Languages

- English
- Spanish
- Ukrainian
- Russian

- **Requirements Engineering:** Translate high-level business vision into clear and detailed user stories and technical specifications, maintaining a high standard for detail and edge-case coverage.
- **Strategic Stakeholder Liaison:** Act as the primary point of contact for Product Owners and Stakeholders to elicit requirements, manage expectations, and provide transparency on delivery progress.
- **Cross-Team Facilitation:** Lead and facilitate technical discussions between distributed teams to resolve dependencies, answer complex logic questions, and architect the most efficient path for feature delivery.
- **Task Management Governance:** Supervise and maintain the health of the task management ecosystem (ADO), ensuring data integrity and clear visibility into project health.

Project Manager, Active Wizards

2015 – 2018

Early-stage PM for a startup focused on pioneering Data Science and Machine Learning solutions.

- **Technical Translation:** Acted as the primary bridge between technical capabilities and global clients; explained ML and Data Science concepts in simple terms to help stakeholders realize the value of their data.
- **Discovery & Strategy:** Advised clients on data gathering and model feasibility, ensuring a solid foundation for over 10 simultaneous projects of varying complexity.
- **Team Leadership:** Managed agile teams of developers and QAs, creating custom education plans to bridge the gap between engineering and data science.
- **Content Strategy:** Authored technical blog articles and use cases to position the company as a thought leader in the emerging DS/ML market.

TV Buyer/Analyst, Dentsu Aegis Network

2013 – 2015

- Analyzed TV media campaigns to achieve planned financial and media indicators.
- Provided data-driven recommendations for future campaigns based on TV viewership analysis.
- Collaborated with account managers to optimize media placement.

Education

Kyiv Taras Shevchenko National University
